## **DETAILED ACTION**

### ***Drawings***

1. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the "substrate having substantially similar size to that of said chip, claim 22 , lines 8-9" must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

### ***Claim Rejections - 35 USC § 112***

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claim 22 is rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The specification is silent regarding "said substrate having a substantially...said chip, lines 8-9"

Art Unit: 2827

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claim 22 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claim 22, lines 8-11, it is confuse. The phrase of "said substrate...edge of said substrate" is not understood. Does applicant mean that "the substrate having a size with almost similar or same size to the chip?"

The phrase of "no pads of said plurality of pads maybe located...said substrate" is not clear.

### ***Claim Rejections - 35 USC § 102***

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) do not apply to the examination of this application as the application being examined was not (1) filed on or after November 29, 2000, or (2) voluntarily published under 35 U.S.C. 122(b). Therefore, this application is examined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

7. Claim 22 is rejected under 35 U.S.C. 102(b) as being anticipated by Nakamura et al. (U. S. Patent 5,777,391)

As best understood to claim 22, Nakamura discloses an IC package as shown in figures 1-4 comprising:

a substrate (1, column 6, line 47) having a plurality of peripheral openings (slits 5, column 7, lines 44-48) and first and second surfaces;

a chip (semiconductor die 2, column 7, line 11) comprising operative and non-operative sides, wherein said chip (2) is adhered to said second surface of said substrate (column 7, lines 17-20) such that the non-operative side faces away from the substrate;

a plurality of pads (2A, column 7, lines 27-34) disposed on said first surface of said substrate within said peripheral openings (see figure 4), said plurality of pads are not located between said openings and an outside edge of said substrate; and

potting material (7; 7A) filling said peripheral openings (5).

***Allowable Subject Matter***

8. Claims 1-21 are allowed.

The following is an examiner's statement of reasons for allowance:

Neither the references cited nor the cited references teach or suggest an integrated circuit package in combination comprising: a plurality of routing strip on a top surface of a bottom layer; wherein at least one of the routing strip is on an exposed portion of the top surface of the bottom layer (claims 1-15), and vias connecting a plurality of routing strip and a plurality of pads (claims 16-21).

Art Unit: 2827

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

***Response to Arguments***

6. Applicant's arguments with respect to claims 1, 3-22 have been considered but are moot in view of the new ground(s) of rejection.
